THE NAME AND ADDRESS OF THE OWNER DG (TRANSPORT DOCUMENTS)

It was introduced on the occasion of changes in Law on Energy.

There was no consultation between ministries and public.

MIIR could not determine the creators of the new changes (parliamentary political draft), probably they want to control on the Polish market of fuels.

Article 13 of the Act amending the Act - Energy Law and certain other acts introduces a change in the Law Act of the Transport of dangerous goods (for ADR / RID / ADN) and in Article 13 is a new paragraph 2 (attached)

"2. The participant in the carriage of dangerous goods is required to indicate in the transport documents accordingly in the ADR, RID or ADN the name and address of the owner (dg) at the time of transport dangerous goods of the person performing the carriage" (the carrier).

THE NAME AND ADDRESS OF THE OWNER DG (TRANSPORT DOCUMENTS)

MIIR sent to the Road Inspection (ITD) a **request for non-punishment** the participants in the carriage of dangerous goods if they do not indicate owner of the goods on documents *(penalty for the wrong transport document is 300 zt for consignors and also for carrier or 2 year prison).*

MIIR has plans to apply to the Ministry of Energy with a request for clarification of the recording/ provision (maybe this requirement only for transportation of fuel in tanks) or total delete of the new provision.

Therefore, at present is mandatory to mention the owner of the all dangerous goods (with name and address) in the transport document for road/rail transportation.

According to Regulation for the owner of the goods it shall recognize an entity that filled the tank and has given to the transport of dangerous goods.

As for multimodal transport on this point Regulation it does not comment since it concerns only road transport, and in accordance with the shipping documents for the transport of dangerous goods by road is necessary to raise the owner of the goods.

THANK YOU 😊
